LLIN Distribution Programme – Detailed Information

## Summary

# of LLINS	Country	Location	When	By whom
100	Uganda	Kampala/Wakiso Districts	April 08	African Children's Development Trust (Nikki Collinson)

## Further Information

1. Please describe the specific **locations & villages** to receive nets and the number to each? Please provide longitude/latitude information. (Important note: If the distribution is approved, approval will be for the nets to be distribution to these specific locations. Location changes will only be considered, and may be refused, if due to exceptional/unforeseen circumstances.)

100 nets will be distributed to three specific locations where there is desperate need:

- Kiro Kabowa Childrens Centre, Sembule, Kampala: 60 nets
- Kikusa Orphanage, Mwela, Wakiso: 19 nets
- Nagalama Hospital, Luwero District: 21 nets

2. Is this an **urban or rural** area and how many people live in this specific area?

1. Urban Area - Slum area on the outskirts of Kampala. Population of whole slum unknown. Net distribution to the school/orphanage only.

2. Rural area, small children's home 28 children in residence

3. Rural hospital serving the area of Luwero. 100 bed hospital with existing 80% net coverage. Population of the area unknown.

3. Is this a **high risk malaria area**? If yes, why do you designate it as high?

The school area in the slum has a high risk of malaria due to the environment in a swampy, marsh area with threats from a continual flooding river & no drainage. The school reports average 4-5 cases of malaria per week from the 132 children who attend.

The home in Kikusa has better drainage facilities but is however plagued by mosquitoes with many of the children having had malaria 3 times already in 2008

The hospital is a general hospital treating all ages for a range of conditions & operations & all the cases of malaria in that area.

4. How many **reported cases of malaria** and **malaria deaths** were there in this area in 2005? If you do not have statistics please make a qualitative comment.

I'm sorry I have no access to this information or feel able to make a comment.

5. Is this distribution of nets '**blanket coverage**' of an area/village or to a **select/vulnerable group**? If the latter, please describe this group.

Selected/vulnerable group.

6. What is the **existing level of ITN use** in this area? Are there **existing bednet distribution programmes** in this area?

There are no existing bed net distributions that I have been able to locate. From basic questioning I believe the net usage in these areas is low, due to cost of purchasing the nets.

7. **Why was the area/villages chosen** for bednet distribution and who made this decision? Please provide the name, position and organisation of the person/s making the decision.

The locations for the distribution was decided by Nikki Collinson the founder of the Africa Childrens Development Trust based on the work being completed by the organisation.

8. Have you **consulted with the National Malaria Programme** in your country about this distribution and what was their response? Please provide the name, position and contact details of the person/s with whom you have liaised.

Not contacted given this is a very small distribution.

9. Please describe any **pre-distribution activity**, in particular how the size of the target group and number of nets required will be ascertained?

We have established the number of nets needed in each of the locations.

10. Please describe **how the bednets will be distributed**, by whom, whether distribution will be a focussed effort or part of a combined programme and if there will be an information/education component to the distribution? Please indicate over what time period (typically, the number of days or weeks) the distribution will occur.

The nets will be distributed by Nikki Collinson & put up over the course of one week in April by Nikki & 2 colleagues. We will physically put up each & every net! There will be basic malaria education and instruction as to proper use of the nets.

11. What **post-distribution follow-up** is planned to assess the level of usage (hang-up percentage) of the nets? How long after the distribution will this assessment take place? Will you provide us with the findings? What will you be able to do subsequently to increase net hang-up if relevant?

ACDT return visits will be planned for Sept 2008 to confirm continual usage.

**12. Please give the name and contact information for the (government) head of the district health management team for the/each area. Please ensure you include contact information.**

Again not contacted due to the small number of nets being distributed.

**13. Please confirm the nets will be distributed free-to-recipients, a requirement for us to fund nets.**

Yes.

**14. Please confirm you will send us, post-distribution, at least 40 digital photos per sub-location, taken at the distribution/s, to be added to our website as we report on the distribution to donors.\***

Yes.

**15. Please indicate if you will be able to provide video footage from each sub-location. This is not mandatory but is preferred and aids reporting to donors and encourages further donor giving.\***

Yes.

**16. Please confirm you will send a Post-Distribution Summary when the distribution is complete.\***

Yes.

**17. Please provide your name, role and organisation and full contact information.**
