

## Summary

# of LLINS	Country	Location	When	By whom
40,000	Senegal	(1) Dioffior, (2) Foundiougne, (3) Guinguineo (Fatick region)  (4) Popenguine, (5) Joal Fadiouth (Thies region)	June 2009	Red Cross – Senegal

## Further Information

1. Please describe the specific **locations & villages** to receive nets and the number to each? Please provide longitude/latitude information. (Important note: If the distribution is approved, approval will be for the nets to be distribution to these specific locations. Location changes will only be considered, and may be refused, if due to exceptional/unforeseen circumstances.)

Fatick Region

Dioffior: 110 bales = 11,000 LLINs (14°11'N, 16°39'W)

Foundiougne: 76 bales = 7,600 LLINs (14°07'N, 16°28'W)

Guinguineo: 112 bales = 11,200 LLINs (14°16'N, 15°57'W)

Thies Region

Popenguine: 72 bales = 7,200 LLINs (14°34'N, 17°06'W)

Joal Fadiouth: 30 bales = 3,000 LLINs (14°10'N, 16°51'W)

2. Is this an **urban or rural** area and how many people live in this specific area?

Fatick Region

Dioffior: peri-urban: total pop: 59,799

Foundiougne: rural: total pop: 41,121

Guinguineo: peri-urban: total pop: 61,065

Thies Region

Popenguine: rural total pop: 33,944

Joal Fadiouth: urban: 76,641

3. Is this a **high risk malaria area**? If yes, why do you designate it as high?

The locations are in areas where malaria is endemic and seasonal and are therefore considered high risk in Senegal. This national distribution is to go ahead just before a rainy season and therefore an annual peak in malaria cases.

4. How many **reported cases of malaria** and **malaria deaths** were there in this area in 2005? If you do not have statistics please make a qualitative comment.

In the 2006 Malaria Indicator Survey estimated that 37% of children under 5 had had an episode of fever or convulsions,

(clinical indicators for a case of malaria). In 2006 there were 1,456,000 malaria cases causing 9600 deaths in total in Senegal (WHO World Malaria Report 2008)

**5. Is this distribution of nets 'blanket coverage' of an area/village or to a select/vulnerable group? If the latter, please describe this group.**

The target group is children between 6 and 59 months and pregnant women.

**6. What is the existing level of ITN use in this area? Are there existing bednet distribution programmes in this area?**

In 2008 there was an LLIN distribution in the area, this subsequent distribution aims to fill the gaps still outstanding in LLIN ownership in the target groups.

**7. Why was the area/villages chosen for bednet distribution and who made this decision? Please provide the name, position and organisation of the person/s making the decision.**

The locations are in areas where Red Cross teams will be carrying out the distribution following discussions with other distribution partners such as PMI and PNLN (National Malaria Control Programme) and where it is felt the donor requirements can be efficiently and economically met.

**8. Have you consulted with the National Malaria Programme in your country about this distribution and what was their response? Please provide the name, position and contact details of the person/s with whom you have liaised.**

Yes, the nets will form part of a national distribution campaign. Dr Mame Birame Diouf NMCP Deputy Coordinator e-mail mbdiouf AT sentoo.sn phone +221 33 869 07 99

**9. Please describe any pre-distribution activity, in particular how the size of the target group and number of nets required will be ascertained?**

There is a national IEC campaign planned including television and radio spots in two languages. The Red Cross plan to carry out pre distribution community sensitisation.

**10. Please describe how the bednets will be distributed, by whom, whether distribution will be a focussed effort or part of a combined programme and if there will be an information/education component to the distribution? Please indicate over what time period (typically, the number of days or weeks) the distribution will occur.**

Vouchers will be distributed to the target group during door-to-door distribution of vitamin A and mebendazole. The vouchers are then redeemable at local fixed LLIN distribution points.

**11. What post-distribution follow-up is planned to assess the level of usage (hang-up percentage) of the nets? How long after the distribution will this assessment take place? Will you provide us with the findings? What will you be able to do subsequently to increase net hang-up if relevant?**

There are due to be follow-up surveys one month and four months after distribution. In May 2010 a national DHS survey

with additional questions regarding LLIN use will take place. Subject to funding availability the Red Cross plan to carry out door to door Hang Up activities directly after the campaign to ensure nets are hanging and then Keep Up activities which form part of community health activities to maintain awareness of key health messages regarding malaria and the significance of net use.

**12. Please give the name and contact information for the (government) head of the district health management team for the/each area. Please ensure you include contact information.**

Fatick Regnl Health Director Dr Sarany Coly +221 33 949 10 97  
Popenguine Regional Health Director: Dr Ba +221 33 957 71 26  
Joal Regional Health Director: Dr Almamy Hanne +221 957 10 30

**13. Please confirm the nets will be distributed free-to-recipients, a requirement for us to fund nets.**

We confirm the nets will be distributed free to recipients.

**14. Please confirm you will send us, post-distribution, at least 40 digital photos per sub-location, taken at the distribution/s, to be added to our website as we report on the distribution to donors.\***

We confirm the Red Cross will provide at least 40 digital photos per sub-location.

**15. Please indicate if you will be able to provide video footage from each sub-location. This is not mandatory but is preferred and aids reporting to donors and encourages further donor giving.\***

We confirm the Red Cross will provide at least 5 minutes of video footage from each sub-location.

**16. Please confirm you will send a Post-Distribution Summary when the distribution is complete.\***

We confirm the Red Cross will provide a Post Distribution Summary when the distribution is complete.

**17. Please provide your name, role and organisation and full contact information.**
