

## **Summary Report of post distribution for World Swim for Malaria Foundation**

### **1. Distribution Location**

The location for the bed nets distribution is Oromia region, east wollega zone Nekemet town and its surrounding.

### **2. High risk malaria area?**

According to Ministry of health of Ethiopia and the zonal health office and Nekemete hospital report malaria is the top 10 cause for morbidity and the first cause of mortality registered.

### **3. Total number of net distributed**

Since the area is not one of the target areas of Ministry of health for mosquito nets 2000 pieces of LLN were distributed

### **4. Mode of distribution**

The distribution is done in single distribution targeting PLWHIV, OVCs, pregnant mothers and chronically ill patients who can not afford to by LLN.

### **5. Selection**

Selection of the beneficiaries was made in consultation with ministry of health, organization for social services and AIDS (OSSA) kebele administration and stakeholders working on HIV/AIDS

### **6. Pre-distribution activities**

Beneficiaries were given basic training on the use of the bed nets and related issues

### **7. Documentation**

The distribution process has been documented in photograph and videos that are sent to IFRC regional office

### **8. Follow up**

Post distribution follow up is planned to be carried out by home based care facilitators (HBCF) regularly to assess the level of usage and how it is used. This would be carried out during home visit at least two to three times per month.
